Forecast for Friday 17 Jun 2022

Weather: Fine and dry to start the day with some warm sunny spells developing. High cloud may make the sunshine hazy or milky at times. Turning cloudier for the evening with spells of light rain.

Chance of cloud-free hill tops above 800m: 100% lowering to 20%.

Low Cloud and visibility: Cloud bases are expected to remain above the summits until they fall to between 400-600 m with the arrival of rain from the northwest. Visibility will be good, occasionally moderate in light rain, and poor or very poor in cloud over the summits.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View
A fresh to strong breeze over the summits will make it feel chilly in exposure. UV levels will be high and it is worth taking precautions against sunburn.

Forecast for Saturday 18 Jun 2022
Weather: Rain will clear southwards through the early hours of Saturday morning to leave a dry day with a fair amount of cloud at times but also some bright or sunny spells. Light winds.

Maximum wind: generally N to NNW 10-15 mph.

Chance of cloud-free hill tops above 800m: 20% rising to 100% through the morning.

Low Cloud and visibility: Cloud bases at 400-600 m will lift to above the summits through the morning. Visibility will be good but poor or very poor in cloud over the summits.

Temperature: **Valleys:** 12 Celsius rising to 14 Celsius by the afternoon.
At 800m: 8 Celsius falling to 6 Celsius by the afternoon.
Freezing level: Above the summits.
